

NA presents:

Appareo Systems and Stratus for ADS-B / Spatial Disorientation, What's wrong with this picture?

Appareo Systems has developed Stratus which turns your electronics such as iPad into the ultimate tool for pilots, delivering subscription-free weather, ADS-B traffic, GPS position and attitude information—all from a wireless receiver that fits in your pocket. Talk to the developers of this system and find out more about the product and its uses.

The FAASTeam sponsors a "Topic of the Month" that reflects an aspect of pilot safety issues across the country. We will talk about the physiological aspects of becoming disoriented. It's Back!!! That's right! the Vertigo chair has found its way back to Fargo. For the past 30 years, the Vertigo chair has helped the FAA demonstrate to pilots the effects of becoming disoriented. Come and see how you do! (Remember to keep you hands inside the vehicle at all times).

Directions: From I 29, take Exit 69 at 40th Ave, North and procedd East to 20th Street North on the North sise of the Fargo Hector Airport. Proceed South on 20th Street N. to Jet Drive, turn right, the event is located on the second floor of building #2.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
